

Datafile for QuickBooks

The Standard Chart of Accounts data file has been prepared by QUT using the Reckon QuickBooks version 2009/10. In QuickBooks not account numbers are used. The default is alphabetical. The links between accounts and relevant tax codes need to be set up and completed by organisations including preferences to make processing of transactions easier and more efficient.

For further instructions on how to open the file in QuickBooks, please refer to Section 2 "Installing and Setting up QuickBooks" the QuickBooks startup guide.

To Download:

1. Right click on link below.
2. Select Save As Target... save the file into C:\Program Files\Intuit
3. For instructions on how to open the data file via QuickBooks, refer to Section 2 "Installing and Setting Up QuickBooks" in the QuickBooks startup guide - Section "Review your Chart of Accounts" page 20.

This file can only be downloaded in conjunction with [QuickBooks software](#).
